

Flood inundation in Kale Township

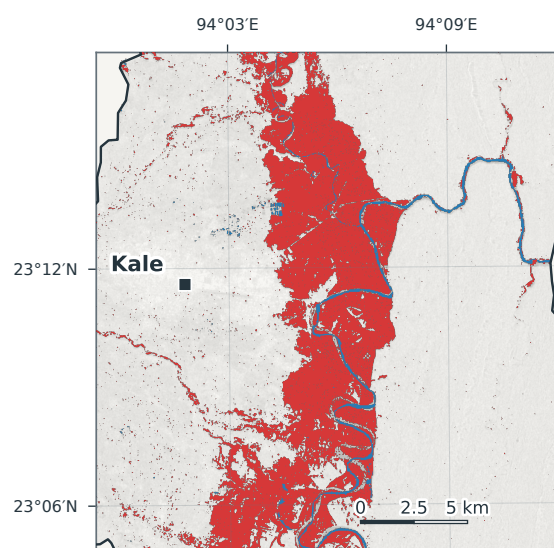

Sagaing Region, Myanmar | 22 August–3 September 2026

b Location in Myanmar

c Central valley detail

- New inundation
- Reference water¹
- Kale Township boundary
- Other township boundaries
- Town location (MIMU)

159.9 km²

New inundation · 6.85% of township

¹ JRC seasonality ≥ 4 months; excluded from the new-inundation class.

Sentinel-1D IW GRDH · VV · descending relative orbit 4 · two frames per date (UTC)

Method: terrain-corrected γ^0 ; 30 m nominal circular mean; $\Delta VV < -3$ dB; slope $< 5^\circ$; JRC water excluded.

Map: WGS 84 / UTM zone 46N; graticule: WGS 84. Background: post-event SAR (display stretch).

Contains modified Copernicus Sentinel data (2026). Analysis: GeoNet Myanmar; boundaries/town: MIMU.

Reference water source: EC JRC/Google; terrain exclusion: WWF HydroSHEDS.

Static reproduction of the published classification; new water since 22 August, not total standing water.
